Number 14

## Town Endebted To Young Men For Skating Rink

Their Enthusiasm and Work Kept Rink Going

Great credit is due to the young men who have been conducting the skating rink here this season. With Eric Congram as president, Elmer Congram as secretary, Roy Allen-lack, Keith Ellis and several other young men as assistants, the rink has been a most enjoyable place for the young people of the town during the winter months and has been most successfully conducted.

It will be surprising to citizens to learn that it has cost their children, not a nickel to enjoy the use of the rink during the entire season. The officials and assistants have done considerable work getting the rink in shape and keeping it free from snow and we are informed that some of these workers have spent their own money in order to keep the rink going.

Citizens of the town, especially those whose children have been enjoying the use of the rink, should get behind these young men and help make arrangements for the necessary improvements for next season. The town is greatly indebted to these young men for their enthusiasm and work.

Canadians who enlist in foreign armed forces are liable to jail terms up to two years and fines up to \$2,000, under the bill introduced in the federal house.

The provincial government's five year highway plan will involve a total expenditure of \$10,000,000 but it is contingent upon a plan of social credit becoming operative. Hon W A Fal-low, minister of public works, stated in an interview.

Griff failed to say "Why don't you get out and find a job when I was your age I was working for \$3 a week in a store and at the end of five years I owned the store."

Son: "You can't do that now. They have cash registers."

Hon W M Chant, Minister of Agriculture, stated that policies evolved to deal with the drought problem had resulted in 60,000 cattle being taken care of, the owners receiving one cent a pound. These were cattle for which the owner could not obtain feed.

## Sudden Death of Mr. Edward Ellis

Funeral Took Place Here Last Tuesday Afternoon

Although it had been known for the past week that Mr. Edward Ellis had been seriously ill it came as a great shock to the citizens to learn that he had died suddenly around away last Saturday afternoon.

Edward contracted a severe cold two weeks ago which developed into pneumonia from which he gradually grew worse and his weakened system could not withstand the strain.

The funeral took place from the Ambrose church last Tuesday afternoon and the service was conducted by Rev H S Hammett. The remains were interred in Redcliff Cemetery.

The late Mr. Ellis was a respected gentleman of the old school. His cheerful disposition and pleasing manners won for him many staunch friends among both young and old. For the past fourteen years he has been caretaker of the school and has performed his duties in a most conscientious, faithful and satisfactory manner with as much interest in the building and the pupils as though they were his own.

Heart felt sympathy is extended to Mrs. Ellis in her sad bereavement.

The late Mr. Ellis, who was 71 years of age, was born in Jersey, Channel Islands. He came to Canada in 1906 and settled in Ontario for a short time after which he moved to Alberta and took up a homestead near Suffield.

In 1918 he abandoned the farm and moved to Redcliff where he secured employment in the rolling mill and the Dominion Glass plant. Fourteen years ago he was engaged as caretaker of the school which position he held until his death. His only survivor is his wife.

The supreme Court of Canada has ruled that Virginia Mills is entitled to the \$100,000 awarded her by the jury in her action for seduction against J A Brewster, former premier of Alberta.

Despite the drifted roads with snow feet high and packed down Mr Pratt, the mail carrier for Binville, successfully made his return trip again this week. His fine new Plymouth car which he purchased from the Park garage recently, made the grade in good time without any serious trouble and without using chains. His car is nicely built for this purpose and he is of the opinion it is one of the best on the road.

## The King to Take A Revised Oath

Will Recognize Nationhood of The Dominions

King George when he takes the solemn oath of the coronation will recognize the nationhood of the dominions.

Conforming to the new constitution of empire was embodied in the statute of Westminster, the oath will call upon the king, "to solemnly promise and swear to govern the peoples of Great Britain, Ireland, Canada, Australia, New Zealand and the Union of South Africa, of your possessions and other territories to any of them belonging or pertaining, and of your Empire in India, according to their respective laws and customs."

It was shown in publication of the new oath that the King's profession of faith had been changed to make it clear his references to the Church of England and its settlement were confined to the United Kingdom. The King's title will be referred to in the oath without the phrases "by the grace of God" and "defender of the faith."

## Federal Members Want Douglas Back

Whether or Not Mr Aberhart Continues as Premier

J H Blackmore, Social Credit leader in the federal house, and P J Rowe independent S C M P expressed opinions that Major Douglas should again visit Alberta to assist in the introduction of Social Credit here. Mr Rowe wants Mr. Douglas to come whether or not Mr Aberhart continues as Premier.

Medicine Hat (Stampede Assn.) has decided to hold their stampede this year for three days in the middle of June.

No less than 352 Alberta school districts defaulted on debt service payments with total arrears amounting to \$216,912.

The death sentence on Mrs. Pogurne, who was an accomplice with Emanuel Ernst in the murder of her husband, has been commuted to life imprisonment.

The last census shows a gain of about 51,000 in population for the prairie provinces in the past year. Sask. and Manitoba made the gain and Alberta fell back.

A reception for Mrs. Forbes, president of the W.M.C. of the United Church of Canada, was held at Gordon Memorial Manse.

Mrs. Ellison was assisted by members of the W.M.S. The manse was nicely decorated with a beautiful assortment of flowers of various kinds. Mrs. Farrgrave and Mrs. Hall served tea and Mrs. Thacker, Mrs. Learmonth and Mrs. Lenning assisted in serving.

## Two Hockey Wins For The Local Lads

Got Even With The Bombers From Med. Hat

During the past week the Redcliff Maple Leaf hockey team won two games from the Medicine Hat Bombers. In both games Redcliff lads showed a big improvement in their combination work and kept the Bombers guessing all the time.

In last Thursday's game at Medicine Hat, Redcliff won out with a 2-1 score and put up a splendid exhibition throughout making the most interesting game of the season. In the first period there was no scoring but after two minutes in the second P Fulton took a hot pass from E Congram and landed in the net. In the last period Allen back and Fulton made a fast rush for the net and Allan back landed for the second goal. Shortly before the bell rang, Terrin scored for the Bombers.

In last Sunday's game here Redcliff almost smothered the Bombers with their speed and stick handling, winning out with a 4-1 score. In the first period Congram scored the only goal for the Bombers but it was only a few minutes later when Congram mistified the visitors' defence and tied the score. Redcliff took the lead in the second period when E. Sel-well landed on a pass from Muncall. Two more goals were made for Redcliff in the last stanza when Vernon B. Porteus took a well aimed shot and E. Schmidt took possession of the puck in the scramble in front of the net.

Redcliff lads are showing remarkable improvement in their season. Arrangements should be made to get the Maple Leafs into the league for next season.

## Four Candidates Nominated For Town Council

Voting Next Monday - Only To Be Elected

Nominations for town council were taken place last Monday. There were three vacancies to be filled and four candidates were nominated. These nominations were necessary as the regular occasion for nominations went by default as no candidates were nominated.

The following candidates were nominated: L. Morton by H G Sheehy and H M Sangster, M Rindahl by C Evans and G G Rucholtz by R S Hodges and M Rindahl.

A E Shaw by J Hope and W L Henderson. Each candidate has 48 hours to withdraw if he wishes, as there are only three vacancies to be filled.

If none withdraw, election will be held in the Town Hall next Monday between the hours of 10 a.m. and 7 p.m. At the same time and place property owners will vote on the question as to whether or not the mayor and councillors should be paid for their services.

At a government sale by public tender the Alberta government received \$23,000.50 from the sale of petroleum and natural gas rights on 80 acres of land south of the large crude oil producers.

Statistics prove conclusively that a locomotive is not afraid of an automobile.

It's better to be careful a hundred times than to be killed once.

"Reward" wheat has beaten Marquis for the Canadian championship at Toronto and the world championship at Chicago. This wheat is considered better than Marquis for milling and baking value and is from 5 to 7 days earlier than Marquis.

Test eventually revealed the reward lacked in one character most important to the farmer. Its yield was definitely lower than that of Marquis and so has failed, unfortunately, to fill the place expected.

## Churches

**ST. MARY'S CHURCH**  
Mass will be celebrated on the 3rd Sunday of each month at 8:30 a.m.

**ST. AMBROSE CHURCH**  
Rev H. S. Hammett, Vicar  
Holy Communion, 1st, 2nd and 4th Sundays at 9:00 a.m.  
3rd Sunday at 11 a.m.  
Sunday School at 2:00 p.m.  
Evening at 7:30 p.m.

**GORDON MEMORIAL UNITED CHURCH**  
Rev. H. V. Ellison, Pastor  
10 a.m. Church School  
11:15 a.m. Morning Worship  
7:30 p.m. Evening Worship

## Empress Winter Golf Tournament

While the rest of Canada is shivering from the cold, the Empress Winter Amateur Golf Tournament, one of the most important of its kind in the world, is in its 25th year. This is the annual Empire Winter Amateur Golf Tournament, now in its 25th year. It is the most enthusiastic golfers from Canada, the United States, and Europe take part in this tournament. It is a competition for a large number of valuable prizes, including the Sir Edward Beatty Challenge Cup, Chamber of Commerce Trophy, Victoria Rotary Club

Bowl, and Mason Inter-District Team Cup. Favored by summer-like weather, the tournament is the high-water mark of the social season for the winter colony on the many southern tip of Vancouver Island. Victoria will be in festive mood for the event, while Colwood's beautiful clubhouse and the real Empress Hotel, with its chardons, conservatory, and Crystal Grand ballroom, will form an ideal background for the colorful social activities which mark the six days of tournament play. Included as added attractions will be a dinner

and dance and entertainment every evening in the Empress Hotel, with presentation of prizes at a Grand Ball on Saturday night. Golf experts and club allies will find competitors suited to them in the week's play at Royal Colwood. A lovely course constructed on park land, 6,201 yards in length, with a par 72 that was broken only once in tournament play. Play will be divided into classes for both ladies and men, ranging from open amateur events and handicap matches to features that stress the social side of the grand old game.

## Valuable Work Effected By Royal Canadian Air Force In Securing Aerial Photographs

Since 1922 and arrival of the air photograph, 481,000 square miles of Canada have been mapped, mostly in difficult and unexplored regions. Major-General A. G. L. McNaughton, president of the National Research Council, told the Canadian Institute of Surveying.

Speaking at a luncheon in connection with the 30th annual convention, Gen. McNaughton said it through utilization of information obtained from air photographs an important new road to a mining area in Manitoba was shortened by 31 miles. The saving, at from \$3,000 to \$7,000 a mile, also exceeded the total cost of all photographic flying in Canada for a year.

Major-General McNaughton paid tribute to Royal Canadian Air Force flyers who had added considerably to the Dominion's collection of 700,000 air photographs covering nearly as many square miles.

"It was recognized," he said, "from the earliest days of the formation of the department of national defence that the pilots of the air force would need extensive training and practice in air photography, and that it was their important duties in war, and it was the preoccupation of all concerned to see that this training was not as a useful economic purpose."

"As a result of vast proportion of the photographs, which have been made available for military and other uses, have practically cost nothing, for the flying would not be carried out in any event," he added.

Lieut.-Col. E. L. M. Burns, president of the Institute, said adequate mapping throughout the Dominion was essential to successful operation of the trans-Canada airway. He said enormous amounts of money had been wasted through lack of adequate maps in planning mail, transportation systems.

He advocated extension of topographical surveys to aid in mining development and said the Canadian tourist industry would be greatly developed through proper maps.

A paper dealing with aerial surveys and air transportation was given by F. T. Jenkins of Winnipeg. In discussing commercial aerial surveys, he said this industry would be greatly stimulated if the government would contract for a considerable portion of its surveys.

The National Research Council had constructed two specially designed plotting machines in an effort to improve Canadian methods of making maps from air photographs. R. H. Field, of the council, said in another paper, "Excellent progress" had been made in Canada in this line of work, he said.

### Popular Books

#### List Of Books That Have Been Read By Millions

A list has been prepared of books that in the past 50 years have sold to the extent of a million copies or more. "In His Steps" by Charles M. Sheldon, published in 1899, leads all the rest. It has been bought by 6,000,000 people. Next on the list is "Treasure," by Gene Stratton Porter, with a sale of 2,000,000, followed by "Girl of the Limberlost," 1,600,000 and "Ladies," by the same author, 1,500,000. "The Winning of Barbara Warren," Harold Bell Wright, 1,500,000; "Tom Sawyer," 1,400,000; others include "Uncle Remus," "Ben Hur," "The Outline of History," "Pollyanna," "The Call of the Wild," "Little Shepherd of Kingdom Come," "Treasure Island," "Huckleberry Finn," "David Copperfield," "The Virginian," and "Five Little Pipers and How They Drove." There are more than 200 titles, of which perhaps three would be rated first class by the normal literary critic.

Modern books to go over the million mark are "Anthony Adverse" and "Gone With the Wind."

### Highest Qualification

Twenty-two Canadian Aviators Receive Transport Pilot's License

Qualification of 32 pilots for their transport pilot's license—the highest qualification granted in the Dominion—was announced by G. A. Thompson, general manager of Canadian Airways Ltd.

Mentioning recent suggestions that Canadian pilots were unprepared for land flying and use of instruments, Mr. Thompson said Canadian Airways pilots were trained and ready to take over the operation of high speed transport planes if called upon.

Paris, France, did not adopt a standard hour until 1914.

### Revolution In Building

#### Exhibits Indicate Canadians Will Soon Be Using Glass Blocks

Come the architectural revolution in Canada, people who live in glass houses will be able to undress in the dark. Also, they will be able to throw stones just like anyone else.

An impression of architectural trends gleaned from photographic exhibits of outstanding works throughout the Dominion during the last two years indicates glass blocks will be used more and more in Canadian homes and business structures.

The glass blocks admit a lovely light but can't be seen through. They provide an insulation that keeps a home warmer in winter, cooler in summer. They are practically unbreakable.

When the sixth national exhibit of architecture and allied arts, sponsored by the Ontario Association of Architects, opened in Toronto recently, Lord Tweedsmuir, Governor-General, delivered the opening address.

Photographs of architectural work in Canada since the last exhibition two years ago presented a picture of the Dominion's awakening to modern influences, according to John M. Macdonald, chairman of the hanging committee.

The revolution has taken seed in Canada, Mr. Macdonald said. Young people are particularly interested in flat-roofed houses which allow for sun-bathing, complete simplicity of form, elimination of mechanical crannies and use of clearer, brighter colors in decoration of rooms, larger windows, easier air conditioning and indirect lighting.

Also many new fabrics and building materials have been introduced which suggest new designs and forms.

### Barley Research

#### Results Of Investigation Expected To Determine The Better Types

In close co-operation with industry, research is being carried on in the Division of Biology and Agriculture of the National Research Laboratories of Canada. The results of the investigation are expected to provide a better basis for the selection of the most desirable types of barley for malting, and as malting ordinarily pays a premium ranging at the present time up to 25 cents a bushel for barley of malting quality, the advantages of this research to farmers are obvious.

The average crop of barley in Canada during the last five years has been 73,815,000 bushels, of which from five to seven million bushels were used each year locally for the production of malt. The actual quantity of malt made in Canadian mills in 1934 was 6,412,000 bushels. During the same year the consumption of malt in Canadian breweries amounted to 4,600,000 bushels. Exports of 2,000,000 bushels were shipped to the United States. In addition, some of the barley exported to the United States is used for malting, and it is estimated that at least from one to two million bushels of Canadian barley are malted each year in the United Kingdom.

### Not Yet Achieved

#### World Has Yet To See Lord Christian Country Or City

There is food for thought in the perfectly accurate contention of a writer in the Philadelphia Magazine that the world has yet to see either a Christian country or a Christian city. A Christian city, he says, would be a city without slums, without jails, without poverty, without unemployment, without liquor, without drunkenness, without vice, without jealousy, without hatred, without bitterness. A Christian country, the same writer holds, would be a country without guns, without luxury for the few and hunger for the many, without bribery, without tax evasion and oppression. —Buckley Bowdler and Times.

### Dental Bill For Indians

Dental work for Indian Columbia Indians cost the government \$2,148 in the past three years, according to a return table in the House of Commons. Figures prepared by the mines and resources department in answer to a question by Mr. Barber (Cons., Fraser Valley) were: 1931, \$1205; 1932, \$961; and 1933, \$964.

Germany is exporting books at the rate of 93 tons a month. 2190

## THE REVIEW, REDCLIFF, ALBERTA

### OXFORD UNIVERSITY CREW GOES OUT FOR SPIN

Led by H. P. B. Maaney, son of the Canadian High Commissioner to London, who is the coxswain, the crew of Oxford University carry their boat from the boathouse for a spin on the Isis at Oxford.

### May Carry A Moral

#### Careless Drivers Pay When Self-Inflicted Disaster Is Near

A story in the New York Times seems to carry a moral of some kind for thoughtless drivers.

As the traffic light turned on a busy corner, a frail old woman started to cross the street with a crowd. A big car brusquely moved its way around the corner. While others scattered out of the way, the old woman sat still, seemingly incapable of movement.

Just as the car seemed about to hit her, a silk-hatted man, with a cane, hurried quickly to her aid and swung her out of harm's way. At the same moment there was a sharp report, and the tire of the car went flat.

Talking to a nearby policeman, a few minutes later, a reporter learned that a similar incident had been happening nearly every morning, and that the silk-hatted man figured in each of them.

Following up the story, the reporter learned that the man was a former diplomat, whose foot had been crushed by an automobile; and that it was not a case he carried, but a sword stick.

The forgotten pedestrian, who has to keep out of the way of imperious drivers, should be glad to know he has an avenger.—Gladys Mercury.

### Not Much To Ask

An Ohio state university professor at Trenton, N.J., said that children need meat in bed, and air conditioning and diffused lighting in their houses.

Such treatment, according to the St. Thomas Times-Journal, should result in eggs being laid, fried, baked, scrambled or poached, as desired.

France is the principal source of bauxite, from which aluminum is derived.

A cat's whiskers, normally, are just the width of the pupil.

### Match Industry In Japan

#### Started In Small Way From Teikoku League In France

The Japanese match industry was started in a small way many years ago, the technique of the industry was learned in France.

After a few years Japan was practically self-sufficient and had begun exporting small quantities of matches, principally Sweden, in the following year, combined with the establishment of higher duties in some export markets, mainly India, resulted in output falling to 20,711,000 dozen safety matches valued at \$,062,800 yen in 1933.

The industry is based to a great extent on highly efficient handicraft with wages paid largely on a piece-work basis and with a ratio of one male to three female operatives.

### Horses Of All Ages

#### Saskatchewan Has More Than Ontario And Quebec Combined

Reports that the horse is "coming back" are confirmed by the current bulletin of agricultural statistics from Ottawa. While the estimated total on farms of Canada in 1934, nearly 2,918,540, shows a decrease of 13,777 from that of 1933, the number of colts and fillies is up 35,100 from that of the previous year. Young horses are being raised in every province of the Dominion except New Brunswick, Alberta and Saskatchewan.

The last-named province, by the way, has more horses of all ages than Ontario and Quebec combined. In 1934 total, at 905,060, is down 35,000, which is more than twice the total decrease for the whole country. Alberta though its total also showed a slight decrease, had 18,600 more colts than in 1933.

## A Beginner Could Crochet These.

PATTERN 5792

You'll want them for immediate wear—these smart gantlets—and you can make them of stitching or yarn. They'll make your hands look their prettiest! A beginner can crochet them—they're that easy! They're done in long, straight strips, using a simple stitch that's ever so effectively set off by a trim of patterned yarn. These follow the new line of smart gloves-to-day, shown in a small, medium and large size (all in one pattern); material requirements, illustrations of the gloves and of all stitches used.

To obtain this pattern and 20 cents in stamps of coin (coin preferred) to Household Art Dept., Winnipeg Newspaper Union, 175 McPhillips Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Rust Resistant Wheat To Be Seeded This Year Will Be Distributed In West

### Seeds Gave Him Idea

#### Inventor Of Autogyro Told How Plan Originated

It is grim irony that Juan de la Cierva, who spent his life in seeking to make flying safe should lose it in one of the worst air disasters England has known, comments the Daily Sketch. Although Cierva was only 41, he had more than a quarter of a century's experience of aviation, for he began experimenting at the age of 15. He built the first aeroplane ever made in Spain. He told once how he conceived the idea of the "whirlwind" plane or autogyro. "I noticed the leaves falling from a sycamore tree," he said, "and it occurred to me to wonder why they fluttered down instead of falling plain. Then I noticed that each seed had two wings that spun round and buoyed it up. 'So I thought I'd see if spinning wings would give a plane to the air.' Cierva had persistence as well as imagination for he would never have succeeded. He made 32 different autogyros before he even began to be satisfied. At first his father, a famous politician and formerly Spanish minister of foreign affairs, was sceptical. But the two men were faith and luck finally established the autogyro as a commercial possibility. Now British Lord West, the engineering magnate, and H. K. M. Kinsler, the banker.

### Camouflage Just A Trick

#### Does Not Always Work Perfectly Even With People

Camouflage is the trick of making a thing look like something else. "A battleship is painted to look like a battleship," building is covered with branches to make it look like a clump of trees. Other instances will occur to you.

But camouflage doesn't always work. The battleship can easily be located by a machine that picks up its vibrations, and tells exactly where it is and how fast it is going; or an aeroplane can see both ship and the shadows cast by it.

There are many people who camouflage their work and actions and motives. If they feel anybody is not for long. There is always something that betrays them for what they are. The honest person never tries to camouflage. He does not pretend to be something that he is not.

### Should Know Their Business

Farmer's Advised To Take Inventory And Keep Record

With the beginning of a new year farmers are being urged by university extension departments to know their business and keep simple sets of books.

The University of Tennessee Extension Farm Management Department sets forth that an inventory has five good uses:

1. It shows net worth about all debts.
2. It shows the financial position made in the year.
3. It forms an excellent basis for preparing a credit statement to be used in getting bank credit.
4. It is a valuable list of property for use in settling an estate or establishing insurance claims in case of fire or other destruction.
5. It enables a farmer to keep track of his expenses for repairs and replacement, shortages or surplus of feed, seed and other supplies that should be bought or sold.

In many states university extension departments furnish forms for the inventory and bookkeeping and at the end of the year make a summary of the account.

It shows the financial position made in the year.

### Have Become A Jargon

Important laws have so severely re-stated by Germany's four-year plan that beauty parsons in Berlin have been unable to get eggs for the favorite shampoo. As a result, women arrive to keep appointments with the hairdresser clutching paper bags containing fresh eggs.

### Not Of Much Use

"Although nearly 20,000,000 of them cover the earth's surface, every 24 hours there is no substantiated record of any person having been killed by a meteorite anywhere."

At one time, Kansas had a prairie dog town five miles wide and 200 miles long.

Federal government efforts to halt the rust scourge in western wheat fields by large-scale distribution of a rust-resistant variety of wheat, announced by H. J. G. Gardiner, minister of agriculture.

More than 100 varieties of the new variety, named Renown, will be distributed at \$2 a bushel to farmers in rust-stricken areas in the prairie provinces. Although each applicant is limited to two bushels of this test wheat, enough applications have been received already to exhaust the supply when distribution is made.

The new wheat will be distributed from the following points: Indian Head, Sask.; Brandon, Portage la Prairie, Arborg, Dauphin, Gilbert Plains, Gribble, Marquette, Peterhead, Pelly, Regina, Swift Current, Souris River and Pipestone in Manitoba.

"It should be understood the seed stock comparison does not possess any special standard other than that of belonging to a new variety capable of resisting rust," said Dr. L. H. Newell, Dominion seed expert.

"We want the farmers to give it a fair trial and report next autumn if they find it superior to the wheat it compares with other varieties grown near by."

Dr. Newell said the Renown variety was produced by Dr. C. E. Golden at the Dominion rust resistant laboratory, Winnipeg.

More than 100 varieties of rust resistant wheat are now produced, Renown, Apex and Thatcher. The Dominion department of agriculture is concerned officially only with the distribution of Renown.

Apex is a variety developed at the University of Minnesota. It is a cross from a composite crossing program involving the varieties, Marquis, Thatcher and Thatcher. This variety was produced from a cross made at the Minnesota agricultural experimental station, St. Paul, Minn. It was grown on many farms throughout Manitoba and Saskatchewan in 1934. Apex is being distributed by the University of Minnesota.

### Too Young For Promotion

#### Two-Year-Old Boy Finishes First Grade With Honors

A two-year-old boy, named Basil, was not promoted to second grade this year, three-year-old Joey Ford finished first grade with honors and prepared to confront Columbia University's learned doctors.

Joey, who at the age of two showed a great aptitude for learning and carrots, nailed through first grade in Los Angeles professional school with honors. He is now a first grader, tackling addition, subtraction and the multiple difficulties of the second grade.

Joey's father has said in grief. Because of his extreme youth, teachers thought it best not to promote him to second grade. He is now a first grader, tackling addition, subtraction and the multiple difficulties of the second grade.

Joey's father has said in grief. Because of his extreme youth, teachers thought it best not to promote him to second grade. He is now a first grader, tackling addition, subtraction and the multiple difficulties of the second grade.

"You see," he told them, "the naughty bunny was in a jam!"

### Riddles Of Long Ago

#### Trace Back Riddles To 1000 B.C.

One riddle a champion riddle-collector cannot unravel recently was, "How old is the oldest child?" This, popular, admitted Dr. Archer Butler, had him stumped. Dr. Taylor, chairman of the department of Romance languages and literature at the University of Chicago, said he was "frightened" of the "Sphinx" riddle for he had an 400 B.C. in writings of Euripides. But even more ancient the professor felt was a riddle based on numbers, which he had been traced back definitely 1500 years.

"How old is the oldest child?" This, popular, admitted Dr. Archer Butler, had him stumped. Dr. Taylor, chairman of the department of Romance languages and literature at the University of Chicago, said he was "frightened" of the "Sphinx" riddle for he had an 400 B.C. in writings of Euripides. But even more ancient the professor felt was a riddle based on numbers, which he had been traced back definitely 1500 years.

THURSDAY, MARCH 4, 1937

### Synopsis of By-Law Number 193 of the Town of Redcliff

to be voted on by the Proprietary  
electors of the said town on  
the 8th day of March A D 1937.  
A BY-LAW has been intro-

duced by the Council of the  
Town of Redcliff pursuant to  
Section 65 of the town and  
village act.

The By-Law provides for the  
payment to the Mayor and each  
Councillor attending council  
meetings, of the sum of Two  
Dollars for each meeting so at-  
tended, and it further provides  
that they shall not be paid by  
any Mayor or Councillor  
for such attendances an amount  
in excess of Fifty Dollars in any  
year.

The provisions of the By-Law  
will come into effect after it  
has been approved by the major-  
ity of the Proprietary Electors  
voting thereon and is finally  
passed.

## NOTICE

I, FRANK BAIRD of the

Town of Redcliff, Alberta, Re-  
turning Officer, hereby certify  
That the foregoing is a true  
synopsis of a proposed By-Law  
which has been introduced and  
which will be finally passed by  
the Council of the Town of Red-  
cliff within four weeks after it  
has been approved by the major-  
ity of the Proprietary electors  
voting thereon.

The vote of the said Proprietary  
electors shall be taken on  
this By-Law on Monday the 8th  
day of March A D 1937 com-  
mencing at the hour of 10  
o'clock in the forenoon and con-  
tinuing until the hour of 7  
o'clock in the afternoon at the  
Town Hall in the Town of  
Redcliff.

Dated at the town of Redcliff,  
in the Province of Alberta, this  
8th day of February A D 1937.  
Frank Baird  
Returning Officer

Poultry in Canada showed an  
increase of five per cent on  
June 1st, when the census was  
taken, over the recording at the  
same date in 1935. Despite this  
increase the price of eggs  
during 1936 averaged higher  
than during the previous year.  
The above satisfactory results  
from the farmer's standpoint,  
was brought about by greater  
apparent consumption of eggs in  
Canada, aided by a firm demand  
from Great Britain.

### About the Neighbours

Somebody once said it takes all kinds of people to make a  
world. Most of us agree they are all here. You may like all  
your neighbours and you may not. The point is, it not, WHY  
not?

Would you really, frankly with the man who told you  
that thing, the way and the opposite the next? Would you prefer  
a neighbour who always lived up to his promises, to one who  
promised one thing one day and did something entirely different  
the next?

Would you lend your closest neighbour your binder or  
wagon if you had no reason to suspect he would ever return  
it? Or would you lend him your cold chisel if you knew he  
would tell all his friends you were the most unreasonable and  
most greedy person alive?

Do you think for a minute your community would be much  
more harmonious, a better place in which to live if everybody  
did the best they could, were as fair in their dealings with  
each other as you would have your neighbour be with you?

Is it not a marvelous feeling to know you can trust your  
neighbour? Is there any excuse your neighbour can possibly  
make that would pardon him in your own mind for suddenly  
disregarding all agreements or promises he ever made to you?

This statement is one of a series written by The Mortgage Lenders  
Association of the Province of Alberta. The Association is com-  
posed of 16 member companies. It represents hundreds of thou-  
sands of small investments by typical Canadians. Its loans to  
citizens of Alberta amount to some forty-five million dollars.

(The fifth statement in this series will be published in two weeks.)

As a Life Insurance Policyholder

## You Share in the Ownership of These Valuable Assets

Government Bonds First Mortgages Municipal Bonds  
Industrial Securities Public Utility Bonds

YOUR savings in Life Insurance—which help to form the Assets of the  
company in which you are insured—not only protect you and your  
family but also make you a part owner of high-grade securities.

For example—as a Life Insurance policyholder, you share in the  
ownership of Government and Municipal bonds. These bonds provide for  
the construction of highways, railways, canals, schools, water and sewage  
systems, and other important public enterprises.

You likewise have a definite financial interest in Canadian industries,  
and in Canadian homes and farms.

The Life Insurance companies, which your enterprise and thrift have  
built up, acting on behalf of yourself and 3,500,000 other policyholders,  
invest the Assets you have entrusted to them. In making these investments,  
they exercise the utmost care to secure safety with a satisfactory yield.

Of the combined Assets in the Life Insurance Companies operating  
in Canada, the major part is invested in Government and Municipal bonds  
and securities. Large amounts are also invested in first mortgages on care-  
fully selected city, town and farm properties, and in loans to policyholders.

You can take satisfaction in the fact that Life Insurance companies in  
Canada have faithfully discharged their obligations. Even in periods of  
great financial stress, every obligation guaranteed by their policies has  
been fulfilled.

## Dust Storms In The South-West

### Strip Farming Methods Of Control Have Shown Good Results

Soil drifting is one of the most serious drawbacks to farming in most of the Great Plains area where the practice of frequent summer-fallowing is of necessity followed. A large percentage of the cultivated land is kept free of vegetation each year in order to conserve moisture and ensure a better crop the following season. This land is often subject to drifting at any time of the year unless some precautions are taken. The practice of strip farming along with trash covers and surface cultivation has given excellent results and prevented drifting even during the most severe wind storm.

On the second of December a severe wind storm struck the prairie. The light covering of snow soon blown to the ditches and canals and the bare unprotected fallow fields were at the mercy of the wind. Clouds of dust rose over large fields and visibility on adjacent roads was reduced to a point unsafe for traffic. Areas of lighter soil that had lost their protective cover in the past, but soil drift control measures recently adopted have proved beyond doubt that serious losses can be avoided. An inspection covering many miles revealed that protected fields suffered no damage. The advantages of strip farming as a means of soil conservation were quite marked, particularly so when used in conjunction with trash covers.

Windstorms such as this caused widespread damage in the past, but soil drift control measures recently adopted have proved beyond doubt that serious losses can be avoided. An inspection covering many miles revealed that protected fields suffered no damage. The advantages of strip farming as a means of soil conservation were quite marked, particularly so when used in conjunction with trash covers.

This method of control is being widely advocated throughout the Prairie Provinces, and appears to have fewer disadvantages than were previously anticipated. Many have practised this method of farming for years, and prefer to take the inconveniences rather than take the risk of losses on large unprotected fields.

Cover cropping is also practised with success in favourable areas, and maintaining a heavy mulch is effective on suitable types of soil. Regardless of methods employed, there is sufficient evidence of progress available at the present time to indicate that, providing proper methods are employed, the soil drifting menace will ultimately be brought under control.

Further information concerning the most suitable methods of soil drifting control in the various districts may be obtained from the Dominion Experimental Farms.

### Coachman Wanted

Mayor Of Liverpool Needs Man Who Can Drive A "Four-Handed" Coach

Liverpool is advertising far and wide for a man who is competent to drive the Lord Mayor's "four-handed" coach.

In civic pomp Liverpool goes some of the way with the Lord Mayor of London. His Lordship of Liverpool has a four-horse state coach, for instance, not so large and gilt-covered, and not so lumbering as the historic coach which has been used from the Mansion House on Nov. 9, but all the same quite impressive.

The Lord Mayor of Liverpool's coachman, Edward Khan, has retired on pension, and some difficulty is found in naming his successor. To drive a four-handed coach needs a long apprenticeship, and as there are very few of these equippages left the profession of driver is not over-crowded.

There has even been some talk of relegating the coach to the city museum. It was built in 1820 and with only needed repair twice. Khan drove it for 30 years and never had a mishap.

The wages of the potential Lord Mayor's coachman are fixed at £3 (the £1875) with overtime for house, fuel and light are also provided.

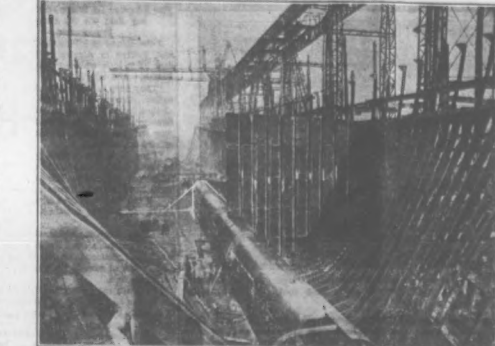

### Filmed In Color

British Vegetation News announced that investigations have been commenced giving it exclusive rights to film the coronation procession in color. Forty cameras will be used and 40,000 feet of film exposed, 20,000 feet of which will be in color and a similar length in monochrome. The color production of the coronation will be supplementary to the black and white production.

It's pretty hard luck to snuff the perfume you bought your best girl floating past you as she goes to the movies with another fellow.

A spider, native to Australia and measuring only one-thirtieth of an inch, is said to be the smallest of this insect-like class.

## BRITISH SHIPBUILDERS "SNOWED UNDER" WITH ORDERS

The shipbuilding yards on the Tyne are enjoying a wave of unusual prosperity, and it is estimated that contracts of a value of over \$100,000,000 are being carried out. Though much of the work is being done for the British Admiralty, there are many commercial orders on hand. This photograph shows a huge oil-tanker under construction. The cylindrical structure in the foreground is the propeller shaft tunnel.

### Started Quarter Century Ago

Moment To Edward The Peacemaker Not Yet Completed

Truth and Justice met in Ottawa in an old building next door to a once famous hotel—waiting for Edward the Peacemaker. They have waited 13 years and may wait in vain.

Truth and Justice, 70 feet tall, were moved to Ottawa from the Toronto studio of Walter S. Allward, creator of the Canadian memorial at Vimy Ridge, to form part of a great monument to Edward VII, the "Peacemaker."

A quarter century ago Allward won a competition that gained him a commission to create a bronze and granite memorial, commemorating the late King Edward. His design was selected from 49 entries because a jury decided it conveyed more than the others a sense of peace, security and power.

Before Allward could start work the Great War broke out. Allward waited till 1922, then went to Europe to begin work. A new difficulty arose. Prices of bronze and granite had skyrocketed and cost of the materials for the monument reached a figure far higher than the \$35,000 earmarked for the work.

But he finished the figures in 1924 and shipped them to Ottawa. Today they're in storage, awaiting the day when conditions permit completion of the complete memorial and choice of a site.

### The Average Englishman

Following Conclusion Were Deduced From A Recent Survey

Who is the average Englishman? The London Dispatch conducted a survey and came to these conclusions: He is thirty years old, has been married three years, has one child. He is just about two feet eight inches tall. His favorite color is black and his tie is blue. Gray is next. He prefers "Gorgeous" cheese to Gorgonzola or Camembert. His Sunday dinner is composed of roast beef, baked potatoes and Brussels sprouts. He likes apple dumplings. He doesn't go to church but denies he is an atheist, shies at the word "agnostic." By preference he reads detective fiction, mystery stories, biographies and travel books. He reads no romantic novels, no poetry, no philosophy, although he will buy a book on health efficiency if it does not cost more than fifty cents. He won't answer questions about his secret aspirations or physiological reactions—Ligature Digest.

### Highly Exciting

According To Professor Goldfish Enjoys Being Frozen

Dr. Paul C. Saunders, a veterinary professor, has found in experimenting with goldfish that the fish are not injured by being frozen solid but rather seem to enjoy the experience. The professor freezes the goldfish by dropping them in a beaker containing liquid air. He then places the frozen fish into a beaker of cold water and within a few moments it begins to wiggle. Soon it is swimming actively.

The oxygen in the liquid air is highly exhilarating, according to Dr. Saunders.

He said the same fish has been frozen as often as four times a day without permanent injury, and that most of his specimens die of old age.

The world's smallest republic is Andorra. 2190

### Change In Coronation Oath

Present Status Of Dominion Makers New Form Necessary

Constitutional changes in the status of the Dominions since the coronation of George V, in 1911 with the effect in a new form of coronation oath when King George VI. is crowned at Westminster Abbey, May 12.

The Earl of Clarendon, Governor-General of South Africa, announced at the opening of that Dominion's Parliament that a bill dealing with the form of the oath would be introduced. Similar bills will be introduced in the parliaments of Great Britain, Canada, Australia, New Zealand and probably the Irish Free State.

At George V's coronation, the Archbishop of Canterbury said: "We solemnly promise and swear to govern the people of the United Kingdom of Great Britain and Ireland and the Dominions thereto belonging, according to the statutes in parliament agreed on, and the respective laws and customs of the same."

The King answered: "I solemnly swear so to do."

With the Dominions having full equality, as set forth in the statute of Westminster, it is felt that the phrase "the Dominions thereto belonging" is no longer suitable.

### Cheer Moves On Postcard

Tournament With Players Scattered Across Canada Will Last Year

Carefully deliberated moves will be marked on postcards by 25 members of the Canadian Correspondence Chess Association who will carry on an organized tournament to last a year. The players are scattered across the Dominion. "There are between 20 and 40 moves to a game, therefore the correspondence is changed between the players," said George Underhill, secretary, who has 20 different games going by mail.

### Farm Placements

Farm placements in Saskatchewan, as the federal bonus plan have secured all previous records. Up to the middle of January, 23,262 men and women, some of them married couples, had been placed. To the same date a total of 29,008 applications had been received.

There are 1,864,643 miles of copper telegraph lines in America.

### Why Do You Think I Am Drunk Just Because I'm Taking a Bath?

—Lustige Blätter, Berlin.

### Tough On The Movie Fan

Writer Charges \$5 Per Cent. Of Theaters Audiences Are Not Intelligent

Pearl Buck writer, charged that \$5 per cent. theatre audiences were unintelligent and that "organized cinema are less a menace than the enormous, stupid, indifferent censorship of the mass mind" demanding trashy books, plays and movies. Addressing the 13th annual conference of the national board of review of motion pictures, the author of "Good Earth" characterized the average motion picture as "abominable fodder."

She urged establishment of a new system of writing and movie production alongside the present system. If necessary, with artists making quality products "for honor, not for money," for audiences as limited as 3,000 in the case of books and 10,000 in the case of movies.

"In the theatre," Miss Buck said, "only five per cent. of the audience are intelligent. A good play fails because the rest isn't interested in it."

### Reformed Calendar

Many Different Plans Are Submitted To League Of Nations

The League of Nations is taking in hand again a job started 13 years ago—the calendar.

The new committee will find that more than 180 different schemes have been submitted to the league, including years of 10 months, each of six days; 12 months of 30 or 31 days; with 60 days and only five Saturdays at the end of the five 31-day months; 12 30-day months each of six five-day weeks, and scores of 11-month years each of 32 days.

The simplest schemes have 12 months making 364 days with various methods of intercalating the 365th day and 366th day of leap years as holidays outside the week and month. Many changes of trade, British and foreign, advocate a year of 12 months, each of 28 days.

Extremely hot weather is necessary to freeze balloons. Only in hot weather are the upward rubbing air currents powerful enough to sweep balloons up into a freezing atmosphere.

A scientist has estimated that all the clouds on earth rolled into one mass would weigh 615,800 pounds.

## Defends Famous Spinners

Chicago Minister Names Ten To Whom World Owes Much

The Rev. Clinton C. Cox of Chicago took up the cudgels for old maids of whatever age or class. The world, he declared, owes a lot to spinners—and "it is time it recognized it."

He undertook to do his bit by preparing a sermon entitled "Tribute to Spinners" for delivery at the Great Park Presbyterian Church.

"Why, some of the finest things in history have been done by women who never married," he said. Forthwith he proceeded to name "ten great old maids," as follows:

1. Florence Nightingale, the saint of modern nursing.
2. Clara Barton, founder of the Red Cross.
3. Jane Addams, noted social worker and founder of Hull House.
4. Frances Willard, founder of the Women's Christian Temperance Union.

5. Christabel Pankhurst, an organizer of the women suffrage movement in England.

6. Susan B. Anthony, organizer of the women suffrage movement in the United States.

7. Sarah Bernhardt, great actress.

8. Mary Lyon, pioneer in the education of women in America.

9. Queen Elizabeth of England.

10. Florence, sister of Moses, who devoted her life to her family.

"Any woman can get married," said Mr. Cox. "But to-day many women don't get married simply because they don't want to. Business has given them independence."

There were three principal reasons why there are old maids:

1. Women force marriage because they want to care for parents or younger brothers and sisters.
2. Women are disappointed in love.
3. Women want a career.

### Indians Claim Rights

May Native Baskets Should Be Duty Free Under "Jay Treaty"

The United States court of customs and patent appeals heard arguments on whether baskets made by Indians on the Canadian side of the St. Regis reservation in Quebec province should be duty-free to the United States duty-free.

The Indians contend the baskets are duty-free under the so-called "Jay Treaty" of 1794 between the United States and Great Britain. The government claims they are subject to a 50 per cent. duty under the 1901 tariff act.

The controversy came before the court on the government's appeal from a decision of the U.S. customs court at Malone, N.Y., to the effect the baskets may be taken over the international boundary duty free. The Malone court held the Indians had this right under the "Jay Treaty" which dealt with international boundary and Indian rights.

Testimony filed with the court said that Indians in an ancient pact with the St. Regis Indians, a remnant of the Iroquois tribe, once known as the Five Nations and later the Six Nations.

The suit was brought by Mrs. Annie Carrow, a member of the tribe. She said her husband had paid duty on baskets she brought to the United States last December.

### The Latest Definitions

New schoolboy hinders collected by an English schoolmaster.

A national government is one where all parties forget themselves. Henry VIII. found walking difficult because he had an abacus on his knee.

A circle is a line running around a dot far ever.

The Romans built their roads straight so that the Britons could not hide behind corners.

A greyer is a female goose.

The Royal Mint is the stuff the king puts on his royal lamb.

The future of the "drunk" is "he is drunk."

Moses is the leader of the Blackshirts.

They could not grow wheat in Egypt, so they irritated it.

The strength of the British constitution lies in the fact that the Lords and Commons give each other mutual check.

So as not to get malaria when they go abroad, wise people get intoxicated before they leave England's shores.

### Choose Violet As Emblem

New Brunswick has joined other Canadian provinces having official floral emblems. The provincial government selected the purple violet as the official flower for this province.

Regulations to prevent exorbitant charges in legal money-lending in the United States have been in effect since the Civil War.

## Compulsory Voting

Doubtful If Canada Could Adopt Law As Present

Would the people of Canada accept compulsively a measure to enforce compulsory voting? If the members of the House of Commons knew the answer to that question they could probably decide whether or not to support such legislation. For years there has been considerable agitation throughout the Dominion for a law of this kind in order to bring out a larger vote. It has been argued that elections in Canada are unduly expensive because of the sparseness of the population and the extent of the territory concerned. A Federal election costs about \$5,000,000 when the printing of voters' lists, the salary of officials and the expenses of the major political parties are added together.

It is only reasonable that, when such a costly effort is made to obtain the opinion of the voters as large a number as possible should exercise the privilege of the franchise. In Australia it is said that 90 per cent. of the people cast their ballots, compared with 58 per cent. here. The system of compulsory voting was established. That is a remarkably high percentage of the entire population. Whether a law of this kind could be adopted in the Dominion is very doubtful. It has been discussed for many years without definite results. In Australia those who fail to register are fined sixty cents, and ten dollars if they refuse to be sworn in. The Dominion, because of its vast extent and varied climate, presents very high problems of population. The question of how to get a larger proportion of the people to go to the polls is under consideration by a parliamentary committee.—Branford Examiner.

### Canada Values Birds

Has Migratory Treaty With United States To Protect Them

Canada has probably 500 different kinds of birds, and each different kind has a different travel schedule; in some cases, the birds migrate at all and may be found even in the most severe winter weather in their accustomed haunts.

For the aesthetic pleasure they give by their presence, by their beauty of song and by their charm of song. They are an important content of interest in forests and gardens, and some birds, which are grouped as game birds, are a major attraction for hunters in the fall. Not only are the game bird kinds used for sport, but also the birds which are valued by the residents in remote parts of Canada as providing an important part of the country's supply.

To protect its bird travelers which spend part of the year in Canada and part in the United States, Canada, almost 20 years ago entered into a treaty with the United States by which co-operation between the two countries was related to migratory birds by means of close season, bag limits, and the prohibition of unfair hunting methods. The birds do not belong to either country, they belong to both.

Canada's Migratory Bird Treaty of 1916 has been of major assistance in conserving this resource, and has been hailed the world round as the first international treaty for bird protection.—Canada's Weekly.

### Diagnosed The Trouble

Veterinary Found Lump On Cow's Jaw

See News Toronto Mail

A Hatter, a male goose, went Dying, Australia, became concerned recently when a large lump appeared on the jaw of one of his cows and showed no signs of going down. Suspecting tuberculosis, he decided not to use the cow's milk. Finally he called in a veterinary surgeon to remove the lump. The veterinary discovered that the cow's complaint was a lumps which had become embedded between its teeth and its cheek.

No body knows

The editor of the McGill Daily is disgusted because he doubts that there are 100 students in the University who could tell what is going on in Europe. If there are only half a dozen, the editor is not at all going on in Europe, the University should be proud of its rating, states the Toronto Globe and Mail.

The migration of birds is believed to have started in the latter part of a tertiary period, but has been absent came down from the north.

## WORLD HAPPENINGS BRIEFLY TOLD

A group of Belgian industrialists plan to visit Canada in May in an effort to increase trade between the two countries.

A King George V. gold crown piece, one of only 25 issued in connection with the silver jubilee of that monarch, has been sold for £200 (\$1,000).

The University of Saskatchewan is not out of April, the new rust-resistant wheat, Prof. Manley Champlin reports. Since Jan. 18, when the wheat first was offered to farmers, 70,000 pounds have been sold.

"Japan's Fleet of Clay," a book written by Mrs. Frelia Ury, correspondent of the Manchester Guardian, discusses Japanese industries and has been banned from Japan.

A \$400,000 relief work program for Winnipeg had the approval of the city council upon the recommendation of the civic relief committee. It includes erection of a new \$1,000,000 city hall.

Finding that delinquent or underprivileged children from four to 14 years old react favorably to musical instruction, one New York borough is giving music lessons to such children.

Mrs. Jessie McBeth Goodfellow, 70, first white child born in Prince Albert, died there recently. She was a daughter of Rev. and Mrs. John McKay, who helped establish the city in 1884.

The personal columns of The London Times carried the following notice: Wanted—Dangerous (legitimate) job for cultured sportsman, 35 years old; five languages; six years interior Africa, caravan expert.

### Time Fully Occupied

Chairman Of B.R.C. Advisory Council Is Busy Man

Lord Macmillan, who succeeds the Archbishop of York as chairman of the B.R.C. Advisory Council, is one of the busiest of men. The number and variety of the commissions and inquiries over which he has presided in the past 12 years, in addition to his legal work, is astonishing. These are the subjects with which they deal: Lunacy, mines, railways, the British Pharmacopoeia, street offences, finance and industry, income tax, the wool industry, the coal industry, Canadian banking, and disputes between Holland and Norway. Somewhere, he finds time, too, to work for the Pilgrims Trust, the Carnegie Trust, a hospital, the National Library of Scotland, a Scottish legal society, and King George's Jubilee Trust, recounts the News of the World. Such a list makes it easier to believe a story told of his days as a judge. To a long-winded counsel he is said to have sent this note: "Patience (Baker) 1, Macmillan! Also see, John." Counsel took the hint.

### Russia's Wheat Problem

To Plant 225,000,000 Acres of Soviet Farm Land

Schedules for planting 225,000,000 acres of Soviet farm land this spring were published recently in Moscow.

About 88 per cent. of this area will be planted by the kollektives (collective farms); 11 per cent. by the sovkhozes (state farms); and less than one per cent. by individual peasants.

The schedule provides measures to guarantee the high quality of farm products. Semi-official sources declared the coming year should see unprecedented development of the speed-up movement and an increase in all harvests especially grain.

### Proof Enough

Private Parker was applying for a new pair of boots.

"The boots you have are not worn out yet," growled the quartermaster. "But worn out!" cried Parker in amazement. "Why, the soles are so thin that if I tread on a stone I can tell whether it's hard or soft."

## Prehistoric Animal

Mammoth Bones Found By Workers Near Lebert, Saskatchewan

The sketches which accompany this article show bones of a mammoth which were found near Lebert, Saskatchewan, by half-breed road workers.

They were in the possession of Dr. V. Roddus, dentist of Roubaix, Sask., and are supposed to be about 10,000 years old.

The mammoth, progenitor of the modern elephant, inhabited the temperate parts of the northern world during the glacial period, and survived until the Neolithic period of human history, a comparatively recent time.

The animal was about the same size as the modern Asiatic elephant.

Fig. 1 shows the tusk of a mammoth.

Fig. 2 shows a vertebra. It measures 12 inches from tip to tip.

Fig. 3 is an ordinary hammer and was sketched to show the comparative size of the bones.

Fig. 4 shows the shoulder or hip blade. It is two feet long and weighs 14½ pounds.

Fig. 5 shows another bone of the same animal.

was covered with a thick skin clothed with long dark hair and woolly fur, and had two large tusks.

No. 1 shows the masticating surface of a molar. This tooth measures three inches and a half in its longest diameter.

No. 2 shows a vertebra. It measures 12 inches from tip to tip.

No. 3 is an ordinary hammer and was sketched to show the comparative size of the bones.

No. 4 shows the shoulder or hip blade. It is two feet long and weighs 14½ pounds.

No. 5 shows another bone of the same animal.

## SLIMMERING WORK-A-DAY

PROCK A CHEERY SIGHT IN COTTON

By Anne Adams

4319 Chas. Chase

When you're as smart and as smart as a pattern as 4319! Looking forward to a busy season of home-making activities? Then make your pattern at least one version of this dapper and comfortable style in your wardrobe to wear year-round.

Wear it with a wide belt, or a wide sash and slim all day long! Trim panels accomplish fashion-miracles in making you appear inches taller, and cut in one with the brief capes, they contribute to your frock's easy making.

Low V-necks are always becoming and this version boasts a narrow, adjustable lispel-neckline. A narrow, adjustable lispel-neckline. A narrow, adjustable lispel-neckline.

Most twenty vests (42" to 48" size) fit 34" to 36" bust. 42" to 48" size fits 36" to 38" bust. 48" to 50" size fits 38" to 40" bust.

Illustrated step-by-step sewing instructions included.

Send twenty vests (42" to 48" size) for \$1.00. Send one vest (42" to 48" size) for 50¢. Send one vest (42" to 48" size) for 50¢.

## BIRD SANCTUARIES

Jack Miner and his two sons, Manly (left), Jasper (centre), about to liberate a pair of Canada Geese to study their route of migration for scientific purposes.

Most people look upon Jack Miner's tagging system of ducks and geese as a hobby, when the fact of matter is it can't be estimated the value in dollars and cents by the various provinces of Canada and American States, because it gives the authorities knowledge of where the birds are each season of the year, and while state and province kills the most and where they are killed in any huge number.

For illustration, North Carolina at one time was killing more than ten states, Jack Miner gives the information to the proper authorities with the result that several sanctuaries were established in that locality which gives the birds a place to breathe between shots. Had it not been for Jack Miner's tagging system the authorities would have realized what a great percentage were being killed in such localities.

The sanctuary has proven that birds will come back to the same place for food and protection. While making a catch a goose was caught wearing two tags—one on each leg. One had been in the tag in the fall of 1924, while the tag on the other was placed on in fall of 1925. Several are often re-caught which have been tagged back as far as the fall of 1928, but seldom is one caught that has been tagged back as far as 1924, chiefly because Jack Miner wears tagging many back that far.

Last winter one was killed in North Carolina that had been tagged in 1924, making 14 years it had worn the tag; or in other words 28 trips across the continent. Jack Miner asks how many trips would it have made back and forth across the continent had it not had a sanctuary to give it safety from the hunters' shot and snare.

Furthermore, the tagging system proves that they go from one place of safety to another. Jack Miner has received several photos from owners of birds taken by a pair of Canada

hens which he has caught and tagged and is about to liberate them to see where they are killed, who kills them and to gain other scientific knowledge of their habits and migration routes.

## Outsiders Get Posts

United States Scientists Hold Joint In British Universities

Throughout the Empire there was a growing tendency for the best posts in science and engineering to go to citizens of the United States. The British Government, in honor at a function given by the chancellor and senate of Leeds University, Mr. Parkinson, who is head of a well-known Leeds firm, recently gave \$1,000,000 to the university.

In trying to find out why this state of affairs existed, Mr. Parkinson said he had had the opportunity of meeting some of these people. He found they had qualifications which rendered them suitable for the posts. The posts were entirely free from any pressure, and, in fact, other things being equal, the British subject would have been preferred.

He wondered whether there was anything in the science training of the universities of the United States which qualified their students better for the posts. He was perfectly satisfied the material available in Britain was better than that in the United States, and he could only think there was something in the training they received that produced these results.

Mr. Parkinson expressed the belief that the provincial universities of Great Britain were the best institutions for improved science training. He thought this for two main reasons. A sterling quality of character existed in the provinces to a greater degree probably than in some other parts of the country. Furthermore, he believed that the older universities were not quite so well qualified to meet the situation as the new ones that they drew their students from a different strata of society.

## T.B. Killing Off Eskimos

The Adoption of White Man's Clothing Said To Be Largely Responsible

Tuberculosis is killing off Eskimos and Indians in Alaska 10 times as fast as it kills whites in the United States. And why?

"They have taken to silk stockings, calico dresses and white man's clothes instead of warm fur," says Senator Thomas (D., Okla.), chairman of the United States Indian affairs committee.

"They lack the white's immunity to white man's diseases, and are very poor and often ignorant," observed Dr. James G. Townsend, director of the health division by the Indian affairs, one-time resident of Alaska.

"Ginger napkins and seaweed instead of native fish and seal blubber," was the comment of an Alaska bureau official who declined to let his name be used.

The death rate, described by these three men as appalling, was disclosed in a study by Dr. F. S. Pedersen, past assistant surgeon-general of the United States public health service and director of the Alaska health service. Dr. Pedersen reported the death rate among Alaskan Eskimos and Indians as 655 per 100,000 as against 100 per 100,000 in the United States.

Other officials expressed belief the Eskimo had referred to silk stockings and calico dresses simply to epitomize the devastating effect upon the native race of the invasion of the white man with his diseases.

Thomas said the Eskimo and Indian women in particular had taken to American style dresses in large numbers regardless of low average temperatures in Alaska, and as a result had lowered their resistance to tuberculosis—by far the most deadly disease among them.

## French Air Force

Has Been Increased 27 Per Cent.

Since Last June

The French air force has been increased 27 per cent. to approximately 1,000 machines since last June 1, the 31st minister, Pierre Cot, told the chamber of deputies. He implied France's air force was strong enough to meet any air threat by Germany, picturing it second only to Soviet Russia's.

The news followed upon a declaration by Communist Deputy Dittion that Germany's "motorized army of 100,000 men" could be buried at the French frontier over new super-highways at the rate of 70,000 troops an hour.

An hour formerly was one-twelfth of the time between sunrise and sunset, and one-twelfth of the time between sunrise and sunset; hence, it was of different lengths in different seasons.

## Conducts Orchestra in Palestine

Toscanini's Organization Composed Of Jewish Refugees From Germany

Arturo Toscanini, who will be long remembered by New York audiences for his musical genius and by all for his courageous anti-Fascist stand, has found a new field for usefulness in Palestine, where he has been conducting an orchestra composed of Jewish refugees from Germany.

A musical organization which he has called one of the world's finest, Palestine showed its appreciation recently by presenting Signor Toscanini with an orange grove which is expected to bear fruit next year and which bears his name. Toscanini, in giving thanks, announced that his refugee orchestra might go to Paris next summer to demonstrate its distinctiveness to the world.

## Dolls For Princess

Two Miniature Dolls Received By Princess Elizabeth

Princess Elizabeth is not usually permitted to accept presents from strangers. But an exception was recently allowed for Eileen Martin and her young sister, Betty, of Weymouth, who sent the princess two miniature dolls.

The girls have received a letter from the queen telling of her majesty's appreciation.

The dolls are so small they were sent in a matchbox. Eileen explained she had drawn pictures of the princess and they were all large so she tried to complete the house build with smaller ones. They were handmade.

## Interesting Local Items

March came in like a lamb all  
right. It is to be hoped the  
lion will lie down with the lamb  
before the end of the month.

An old-fashioned woman who  
used to have prunes every  
morning now has a daughter  
who has dates every night.

Mrs. Ed Vogstad, from Daken  
Alta, with her twin boys, are  
visiting with their Grandpa-  
rents, Mr. and Mrs. O. Vogstad,  
Redcliff. They expect to visit  
here for a month.

Strenuous efforts are being  
made to open up the main high  
way between here and Medicine  
Hat. Tractors plows and  
trucks are being used in an en-  
deavor to get the mountains of  
snow shifted.

A bill, compelling car drivers  
to dim their lights, has been  
given its first reading in the  
legislature. Other important  
regulations governing motor  
car driving will be introduced

There are five political parties  
in the Alberta legislature,  
now. They are Social Credit  
Party, Liberals, Conservatives,  
Independents and Independent  
Social Credit Party. The latter two  
are Jas. Hansen, Taber and S. A.  
Barnes, Edmonton, both of  
whom were read out of the  
S. C. party.

## Work Must Be Found

Through jobs men and women are insured against privation  
and kept of relief. Jobs enable them to hold up their heads  
among their fellow-beings, to be self-supporting, to maintain  
names, to educate and raise families.

With the exception of Alberta, the Dominion has made sub-  
stantial progress in the past year in the matter of increased  
employment. In fact, 60,000 jobs have been made available to  
Canadians in 11 months, or thereabouts. On every hand—with  
the exception of Alberta—there is a definite upward swing in  
the employment pendulum.

What is our situation here? According to statistics issued  
for the week of December 12, 1936, Alberta had 2,694 more  
jobs than for the same week of 1935.

The fact is that the present policy of debt repudiation has  
not increased employment, but has increased unemployment.  
If our men and women are to be found jobs, as men and women  
are finding jobs in other provinces of the Dominion, the credit  
of Alberta must be restored.

This statement is one of a series written by The Mortgage Loans  
Association of the Province of Alberta. The Association is  
composed of 34 member companies. It represents hundreds of  
thousands of small investments by typical Canadians. Its loans  
to citizens of Alberta amount to some forty-five million dollars.

(The eighth statement in this series will be published in two weeks)

A Miracle of Seattle Spent a  
few days in town this week vis-  
iting Mr. and Mrs. A. Pate son.

Mild weather of the past few  
days has melted a considerable  
amount of snow off the streets  
and highways. Clearness of the  
climate has improved the stock

Mr. L. Cahoon, our popular  
mail carrier, had a severe at-  
tack of flu which developed into  
pneumonia. He is at present  
in the hospital and latest re-  
ports are that he is improving  
conditions.

The report of the provincial  
employment service reveals that  
unemployed persons in Alberta  
are 21.9 per cent. greater in  
number ending Feb. 27 than  
the same week last year

## CARD OF THANKS

We wish to express our sincere  
thanks to all those who  
have been so kind to us during  
our recent bereavement.  
W. Birmingham and Son

## CARD OF THANKS

Mrs. Edward Ellis desires to  
convey her thanks to Dr. Ward  
the nurses, and all kind friends  
who assisted during the illness  
and subsequent death of her  
husband, the late Edward Ellis.  
All messages of sympathy and  
floral tributes were received  
with sincere appreciation.  
Mrs. Edward Ellis.

fish is a  
health  
food

HEALTH... yes... because  
Canadian Fish and Shellfish  
are rich in protein, vitamins,  
minerals and iodine. But health  
is not all. There is tastiness...  
the varied flavour of over sixty  
different kinds of fish foods. There  
is economy... the sound value  
of a food that gives you full value  
in healthful nourishment for every  
cent you spend.

Make "Any Day a Fish Day".  
Whether fresh water fish or sea-  
food... fresh, frozen, canned,  
smoked, pickled or dried... you  
can be confident of the prime  
quality and flavour that have  
made Canadian fish famous  
throughout the world.
